Dear Parent and/or Student,

RE: BYOD Technology for Education

Country Tech is committed to assisting parents and students in our community with all their technology needs. We work closely with the teachers and I.T. Departments in the district, and with computer technicians onsite and a host of suppliers, you can be assured that you will receive the best advice, helpful service, and competitive pricing.

Additionally, we are very aware that technology is expensive and many families in our community are doing it tough financially. To this end, we are pleased to offer interest free terms on all educational products through After Pay, Zip, or Humm. If you would like more information on these "Buy Now Pay Later" options, please reach out to me anytime.

Extended lay-by terms are also available if that is a preferred option.

Every technology purchase made under the BYOD campaign includes the mandatory 3-Year Backup Plan, a quality laptop case, Trend antivirus software, and the opportunity to access a loan device if there is a fault during the warranty period.

Lots of parents like to talk through the options available. Please feel free to contact the store and book an appointment with me to explain the different devices, their functionality, and longevity.

If you have any questions or concerns, please call the store on (03) 5772-3165 or email: sales@countrytech.com.au

Kind regards.

Daniel Kriss
